

Pet's Name: _____

Date: _____

SURGERY CONSENT FORM

I authorize May Veterinary to perform _____ on the above pet.
This procedure will be performed under ___general anesthesia ___local anesthesia ___sedation.
I understand and accept the potential risks associated with the above described procedure.

PRE ANESTHESIA BLOOD TESTING

BECAUSE NO PROCEDURE USING ANESTHESIA IS WITHOUT SOME RISK, a preanesthetic blood profile is highly recommended. We will perform a thorough physical examination prior to the administration of any anesthetic, however, not all pre-existing problems may be evident physically. This profile consists of a Complete Blood Count and a Comprehensive Diagnostic Profile. The cost of these tests performed separately is \$99.50, but if performed as a *GROUP ANESTHETIC PROFILE*, the cost is only \$72.00.

This price may not be included in the quoted price for your pet's procedure.

LASER SURGERY

Your pet's surgical procedure can be performed with traditional methods or a CO2 Surgical Laser. The benefits of using the surgical laser for your pet are: **less pain, less swelling, less bleeding and quicker recovery**. The additional fee for the *service is \$44.00* for spays and neuters. You will need to ask for an estimate for any other surgery.

Please initial if you DECLINE the above recommended procedures

Do not perform preanesthetic blood tests on my pet, but please proceed with the scheduled Anesthesia/ Surgery/ Dental specified above.

Do not perform surgery using the surgical laser, but please proceed with the scheduled procedure specified above.

Signature of Owner or Authorized Agent

Date

May Veterinary recommends that all pets have a Microchip implant. The Home Again Microchip can be implanted while your pet is under anesthesia. This microchip can help return a lost or stolen pet. The cost of the implant and to register your pet's *microchip is \$49.99*. Please ask for details.

- Yes, I would like the microchip implanted in my pet.
- No, I do not want the microchip implanted in my pet.
